FORM AND FUNCTION IN PERFECT HARMONY

When the elements of nature come together in a beautiful unification of symmetry, form and function, an architectural landmark is born. The Shores in Oakville is one such icon by noted architect Sol Wassermuhl, President of Page + Steele Architects, Inspired by the lake side setting, Wassermuhl's design gracefully curves towards the water like a sail in the wind. The iridescent glass facade gently rises from the shoreline, with stepped terraces reflecting the lake, unifying water and sky. Spectacular vistas of the lake provide a visual connection to the shimmering waters, The elegant design concept is carried through into the magnificent lobby, suites and amenities.
